Experienced frontend web developer with expertise in React, TypeScript, and modern web technologies. Currently working on high-profile projects such as Medicare.gov and HealthCare.gov, where I am responsible for developing and maintaining user-facing features and functionalities, coordinating the work of other developers, and ensuring the timely delivery of high-quality code.

Work Experience

Softrams, remote
Lead Full Stack Developer (Jul 2024-*present*)

- Utilizing my expertise in React and TypeScript to develop and maintain the user-facing features and functionalities of the websites, with a focus on delivering an intuitive, accessible, and engaging experience for all users.

ICF, remote
Lead Software Engineer (Mar 2024-Jul 2024)
Senior Software Engineer/Technical Lead (Aug 2022-Mar 2024)
Senior Software Engineer (Jul 2022-Aug 2022)

- Currently working as a frontend web developer on Medicare.gov and HealthCare.gov, two high-profile and high-traffic websites serving millions of users across the United States.
- Utilizing my expertise in React and TypeScript to develop and maintain the user-facing features and functionalities of the websites, with a focus on delivering an intuitive, accessible, and engaging experience for all users.
- Contributed to the implementation of multi-factor authentication (MFA) on both Medicare.gov and HealthCare.gov, enhancing the security and privacy of user data and reducing the risk of fraud and unauthorized access.
- As a tech lead on the team, I am responsible for overseeing the technical direction of the project, coordinating the work of other developers, and ensuring the timely delivery of high-quality code that meets the requirements and standards of the project.

SemanticBits, remote
Senior Software Engineer (May 2022-Jul 2022)
Software Engineer (May 2020-May 2022)

- Worked as a frontend web developer on Medicare.gov and HealthCare.gov, two high-profile and high-traffic websites serving millions of users across the United States.
- Utilized my expertise in React and TypeScript to develop and maintain the user-facing features and functionalities of the websites, with a focus on delivering an intuitive, accessible, and engaging experience for all users.
- Leveraged my technical skills and leadership abilities to drive the successful execution of complex projects, deliver continuous improvements to the websites, and contribute to the overall success of the project.

Xactware, Lehi, UT
Developer II (Oct 2018-May 2020)
Developer I (May 2018-Oct 2018)
Internet Applications Developer (Oct 2016-May 2018)

- Worked as part of a team of full stack developers to improve and maintain ContentsTrack, a web application for managing the pack out and pack back process for restoration companies.
- Implemented new site features using C# (.NET), Oracle SQL, AngularJS, and Bootstrap.
- Introduced and implemented changes to modernize front-end, including adding Babel to build process and replacing font icon file with SVGs.

- Implemented live preview and PDF generation for barcodes and QR codes using HTML canvas.
- Migrated entire JavaScript codebase to TypeScript (approximately 40,000 LOC).
- Worked as part of a team of developers on a React application.

Clearwater Analytics, Boise, ID
Software Development Intern (May 2016-Aug 2016)

- Worked as part of a team to implement internal web services using Java (Jersey) and Microsoft SQL Server.
- Wrote unit tests, integration tests, and database stored procedures.
- Implemented front-end user interfaces using jQuery and AngularJS.

MemoryMail, Provo, UT
Full Stack Developer (Jan 2016-May 2016)

- Worked as the sole developer for a startup to create photo books.
- Implemented web application using the MEAN (MongoDB, Express, AngularJS, and Node.js) stack.
- Integrated login and email access with Google and Gmail.
- Integrated payments using Stripe.

BYU Center for Teaching and Learning, Provo, UT
Web Developer (Mar 2014-May 2016)

- Worked as part of team of front-end developers to improve and maintain Learning Suite, a learning management system (LMS) used daily by approximately 35,000 BYU faculty members and students.
- Implemented user interface and functionality using HTML, SCSS, JavaScript (jQuery, Backbone.js, Handlebars.js), and PHP.
- Implemented site-wide audio and video support update, including adding codec detection, in-browser feature detection, and QuickTime integration.
